

Aircraft mechanics 100%

DESCRIPTION

Based in north-western Switzerland, Aero Group is a well-established EASA Part-145 organisation, holding ratings for piston and turbine aircraft, as well as piston and turbine helicopters avionics shop.

We strive to provide our customers with demonstrated craftsmanship, fulfilling current regulations both in the field of Initial and Continuing Airworthiness.

In order to strengthen our aircraft maintenance department, we have an immediate open position for a full time Licenced Aircraft Engineer. The applicant should fulfil following requirements:

REQUIREMENTS

- EASA Part-66 Cat B1.1 licence holder or a confirmed experience
- Type ratings such as King Air series, PC12 or Caravan would be an asset
- Familiar with EASA Part-M, Part-145 and Part-21 regulations
- Very good language skills in English
- Good IT skills
- Willingness to integrate into a growing company
- Good reputation, maturity, integrity and loyal personality with social skills
- Established in Switzerland or willing to re-locate in the area of Neuchâtel

WE OFFER

- Competitive salary in line with Equal pay standards, in a human sized company
- An interesting challenge in an ambitious, dynamic and progressing company
- Possible type rating training for B1.1 licence holder
- Continuous training program
- Location: LSGC and LSGN
- Unlimited term contract
